DETAILED ACTION

Response to Arguments

1. Applicant's arguments, filed 8/17/04, with respect to the rejections of claims 10 and 36 have been fully considered and are persuasive. The prior art made of record fails to explicitly disclose or reasonably suggest an arrayed waveguide grating with central axes of selected input waveguides being displaced along a direction perpendicular to central axes of said input waveguides from corresponding focusing positions by predetermined values to attenuate the signal lights propagated through the selected input waveguides to at least one output waveguide. The rejection of claims 10, and 36 has been withdrawn.

Information Disclosure Statement

The information disclosure statement (IDS) submitted on 10/05/2004 has been considered by the examiner and made of record (note the attached copy of form PTO-1449).

Allowable Subject Matter

2. The following is an examiner's statement of reasons for allowance: The prior art made of record fails to explicitly disclose or reasonably suggest an arrayed waveguide grating with an input slab waveguide connected to a channel array where the central axes of selected input waveguides are displaced along a direction perpendicular to the central axes from corresponding focusing positions by predetermined values to attenuate the signal lights propagated through the selected input waveguides to the at least one output waveguides. Therefore claims 10, and 36 are allowed. Claims 49-53 are allowed by virtue of their dependency.
3. Claims 5-8, 12, 16, 31-34, 38 and 42 are allowed for reasons stated in prior office actions.
